

Installing MyBusiness on Microsoft Windows Vista

Download MyBusiness Version 3.03 Update from mybiz.co.uk/download.html

Extract the zip archive and run setup.exe

Please Note that for all vista installations, you will need to create a new folder under My Documents (named MyBusiness) and then point the installation to that directory before installing the setup file.

Installing MyBusiness on Microsoft Windows Vista

Right click on the new icon and select properties and select the compatibility tab across the top

Under the compatibility mode section

Put a tick in the box (run this program in compatibility mode for) and select service pack 2 in the drop down box.

Select apply then Ok,

Now go to the extracted setup file on the desktop and double click on it then select run, this will go through the install anywhere process.

Click on the Mybusiness icon and you will have a new window appear with several icons

Right click on Launch Mybusiness and select properties then select the compatibility tab across the top

Under the compatibility mode section

Put a tick in the box (run this program in compatibility mode for) and select service pack 2 in the drop down box.

Select apply then Ok,

Once this has been done you can then go back to the Mybusiness icon on the desktop double click then double click on the launch Mybusiness icon.

Please then go through the Wizard and enjoy using the software
